

# Georgian College - Adobe Illustrator Basic

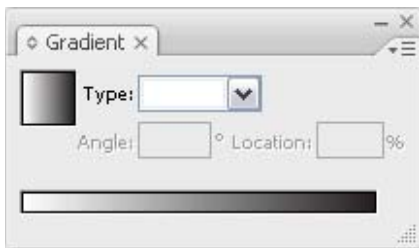

## Adobe Illustrator - Colour

CMYK and RGB Colour Wheel

**Color Guide** - Is a new palette that is used to assist with colour selection. It gives you the ability to find complementary colours based on the currently selected colour.

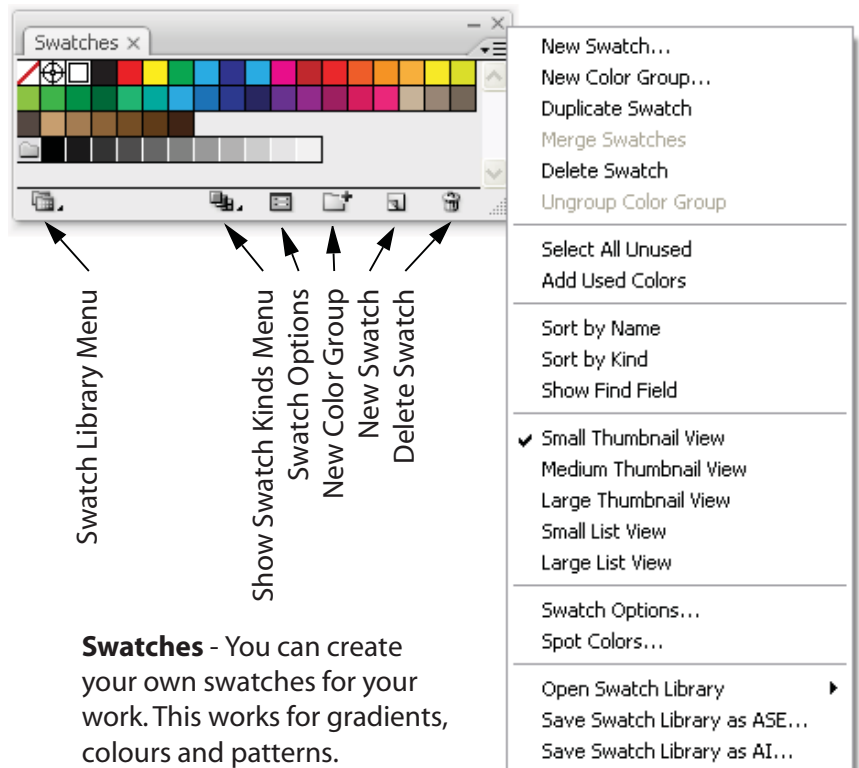

**Gradient** - There are 2 types of gradients: a linear gradient and a radial gradient. You can create your own gradients by dragging colours from the swatches palette onto the gradient palette.

Linear

Radial

**Swatches** - You can create your own swatches for your work. This works for gradients, colours and patterns.
